

Industry Workshops

The 2010 Industry Workshops in San Antonio prior to the 52nd Annual meeting & Exhibit Show are FREE and open to anyone in the blood banking and transfusion medicine industry.

All Workshops take place on Thursday, March 18th in the Executive Salon 4 Room, 3rd Floor of the Crowne Plaza Riverwalk Hotel.

No pre-registration is required to attend these workshops.

8:00 - 9:00 am

Optimizing Blood Donor components in a Changing Economic Environment

Presented by: Pall Medical

Description: How will the changing economic environment affect your platelet production strategies? The answer to this strategic question will influence your organizations ability to grow and compete in today's marketplace.

9:15 - 10:15 am

Additive Solutions for Platelets

Presented by: Fenwal, Inc.

Description: This session will focus on Additive Solutions for Platelets and will include a review and discussion of the relevant data and potential benefits of Platelet Additive Solutions including the collection of additional plasma.

10:30 - 11:30 am

Testing vs. Validation: What are the Differences?

Presented by: R.F. Nozick & Associates

Description: Review the differences between testing and validating blood bank software systems. An overview of required document and what is needed to be compliant for inspections.

1:00 pm - 2:00 pm

Meet MAX. Learn about new tools and an interactive program to educate your donor base and optimize automated collections.

Presented by: Caridian BCT

Description: This workshop will discuss a strategic methodology that will enable you to collect the right blood components, from the right donor, at the right time. A variety of analysis, educational, monitoring and marketing tools will be presented.

Protégé Profile

Toni Douglas,
Carter BloodCare,
Bedford, TX

My name is Toni Douglas and I have worked in the blood banking industry since 1993. Prior to my employment at Carter BloodCare I had worked on the cardiac floor at a local hospital. Seeing the numerous patients receive blood transfusions to treat open heart surgeries and other major health disorders caused me to consider working on the blood donor side of the business. I wanted to work with those who donated the products to help aid in the doctor's treatment for their patients.

I have worked for Carter BloodCare on Mobiles and in Donor Centers as a supervisor for over 15 years. I have worked my way up to my current position as a Quality Assurance Process Improvement Coordinator. I am attending nursing school at this time and plan to obtain my BSN one day. I am currently working on several QA programs; Boot Camp training for seasoned staff members, pressure aide bandage pilot, L-shape pilot for collection process, continuous FDA audits, and a new error tracking systems that was implemented in March 2009.
